

COMMODITY INSPECTION SERVICES BV

RENDERING FIRST CLASS INSPECTIONS ALL OVER THE WORLD

CONTENT

INTRODUCTION

WHEREVER IN THE WORLD ...

Commodity Inspection Services BV, established in 1989 and run by a committed team of experienced executives, offer you a wide range of quality and quantity inspections, technical & consulting services. Commodity Inspection Services BV will oversee on your behalf all or any part of commercial transactions and operations related to the buying, selling, trading and moving of raw materials, commodities, industrial plant equipment and consumer goods.

Commodity Inspection Services BV services are dedicated to the elimination of risk, whether our clients are importers or exporters, buyers or manufacturers, traders of financial institutions. We serve all industries and government and international aid organizations. Our certificates and reports are recognized internationally.

Commodity Inspection Services BV are represented in more than 75 countries.

Our professional staff maintain a uniform quality standard around the world and they operate with total integrity. They are supported by modern laboratory facilities in most key locations and are trained in the latest control techniques. They are serviced by a sophisticated communications network and streamlined management systems. Commodity Inspection Services BV ensure that all clients benefit from the professional and prompt completion of each assignment.

Commodity Inspection Services BV are GAFTA & FOSFA approved surveyors and ISO 9001 certified.

... COMMODITY INSPECTION SERVICES BV ARE THERE

NEWS

ISO 9001 CERTIFICATE EXTENDED

The current ISO 9001 Quality management System as adopted by Commodity Inspection Services BV underwent a re-certification audit in January 2010 which revealed outstanding results. The current system is valid till 2014. Commodity Inspection Services BV hold the ISO 9001 accreditation for more than 10 years and were one of the first inspection organisations willing and able to follow the ISO 9001 standards.

SUDAN

On 16th of September 2006 an agreement was signed with the Sudanese Standards and Metrology Organization, giving Commodity Inspection Services BV the authority to conduct the compulsory inspection as required under Sudanese law. The list of goods is not restricted. The appointment of Commodity Inspection Services BV was received with much acclaim and enthusiasm by the Sudanese people and importers and by exporters to Sudan.

CEMENT

Since February 2008, Commodity Inspection Services BV have been involved in the quantity and quality inspection of Egyptian cement shipped to Sudan. Numerous cement shipments both executed on trucks and on seagoing vessels have been inspected and accepted by SSMO at Khartoum.

MAIN CHARACTERISTICS

- Independent organization
- Professional, tailor-made services minimizing risk
- Centralized management in Rotterdam
- Rapid and efficient reporting
- Highly qualified staff
- Personal attention and responsive service

SCOPE OF ACTIVITIES

TECHNICAL INSPECTIONS

Scope of work which may incorporate any or all of the following beneath listed services.

VISUAL INSPECTION

Visual inspection of the material/equipment for quality, workmanship, defects and cleanliness of work.

DIMENSIONAL CHECKS

Carry out checks to ensure that material/equipment is dimensionally in accordance with approved drawings.

COMPLIANCE WITH SPECIFICATIONS AND DRAWINGS

Welding procedures, welder qualification, coating, rating, material certificates, shop procedures, etc. shall be verified for compliance with specifications, drawings and standard industry practices.

WITNESSING

Witness (non-)destructive and chemical testing of materials, mechanical run test, functional test, vibration test, noise emission test, electrical performance test, etc.

VERIFICATION OF DOCUMENTS

Verify, review and/or approve all documentation required in the purchase orders such as test certificates, examination reports, test procedures, etc.

PACKING AND MARKING INSPECTION

REPORTING

Submit detailed reports of all services performed. Inspection activities for each purchase order will be reported separately.

INSPECTION CERTIFICATE

Issue an inspection certificate immediately after all inspections are completed stating that the equipment or material is in strict accordance with the requirements of the purchase order.

PRE-SHIPMENT INSPECTIONS (PSI)

Pre-shipment inspection services are designed to protect the interests of buyers in their international purchasing programs.

The intervention is an essential part of an international transaction where documented proof of quality and quantity are a requirement of the payment terms.

Due to our network which covers the main key trading centers in the world we offer an unrivaled standard of service by using well trained and professional specialists dedicated to independent quality and quantity control for our clients.

This service starts at the production stage or earlier and continues through to final checking prior to shipment.

Our Inspection Certificates are internationally accepted by banks, governments and considered by international traders and manufacturers as a verification of the quality and quantity of the material purchased.

Typically a service portfolio would contain one or more of the following services at a supplier's manufacturing or loading location:

- Verification of raw or semi-manufactured materials
- Sampling and analysis
- Staged production inspection
- Determination of quantity
- Labeling and documentation control
- Witnessing in-house tests
- Finished product inspection
- Packing and marking inspection
- Supervision of stuffing into containers
- Photographic reporting
- Complete final reporting

By inserting an inspection clause nominating Commodity Inspection Services BV into a letter of credit a client can make payment subject to satisfactory inspection certificate and reduce the risk involved with international purchases.

COMMODITY INSPECTIONS

The commodity shall be inspected prior to shipment either at the premises of the supplier or such other premises as may be specified. The inspection shall seek to ensure strict conformity of the commodity with the agreed upon specifications.

Our services are always adapted to our client's need and include:

- Inspection and acceptance of ship holds, hatch covers
- establishment of intaken/outturn weight by means of draught-survey
- Sampling during entire loading and/or discharging operations and preparation of contractual samples
- Supervision throughout loading/discharging
- Speeding up loading and/or discharging operations
- Conducting neutral analysis
- Check of packing and marking
- Check of bags weight at random
- Damage assessment, if any
- Photographic report
- Certification of quality, quantity & condition

Our spectrum of services covers the following agricultural products:

- Dry bulk cargo
- Liquid bulk cargo
- Bagged cargo
- Consumer goods
- Raw products

SCOPE OF ACTIVITIES

ANALYSIS

Laboratory testing and analysis play a crucial role in commercial settlement and in the assessment of international standards of quality in products and materials.

That is why we are using comprehensively equipped and quality controlled laboratories around the world conducting analysis of all types - physical, chemical, mechanical and micro biological and accredited to relevant standards such as NAMAS, STERLAB and ISO 9001.

GOST-R CERTIFICATE OF CONFORMITY

As from 1992 Russian law came into force making it mandatory that a wide range of products bound for the Russian Federation are tested and certified in accordance with the GOST-R standards. The range of products can be split in the following categories:

- Foodstuffs
- Consumer goods
- Industrial machinery and equipment

The GOST-R Certificate of Conformity allows these products to enter the Russian Federation. The main steps to obtain a GOST-R Certificate of Conformity are as follows:

1

The Client exporting to the Russian Federation instruct us to obtain the GOST-R Certificate of Conformity. An offer will follow and upon accepting our offer the following information is to be provided to us by the Client:

- the exact description, name, type, composition of the product
- type of required GOST-R Certificate of Conformity (single shipment or serial shipment)
- the quantity of the product in case of a single shipment
- name and particulars of the manufacturer of the product
- operating instructions, if applicable
- the custom code of the product

2

We conduct physical inspection and/or sampling/testing of the product and/or auditing the manufacturing process.

3

We evaluate the quality of the product, review test reports and other documentation according to the relevant GOST-R standard.

4

Issuance of the GOST-R Certificate of Conformity.

5

Product passes the customs without delay and/or problems and is accepted at the final destination.

In addition to the GOST-R Certificate of Conformity we arrange for ROSTECHNADZOR permits and SANEPIDNADZOR certificates.

ROSTECHNADZOR (RTN)

ROSTECHNADZOR are issuing permits for a wide range of machinery and equipment such as pressure vessels, boilers, burners, material used in oil or gas fields, chemical plants, refineries even if a GOST-R Certificate of Conformity has already been obtained. We can arrange for these permits.

SANEPIDNADZOR (SAN)

In addition to the GOST-R Certificate of Conformity certain products may require Sanepidnadzor certification (a.k.a. Hygienic Conclusion). This particular certification apply to food and other products related to human health such as packaging machines & furniture.

Commodity Inspection Services BV offer a fast and reliable certification service for the main industries including the oil and gas sector.

RELIEF GOODS INSPECTIONS

Commodity Inspection Services BV regularly serve the following Aid organizations:

- Care Kazakhstan
- Deutscher Caritasverband - Caritas International
- Deutsche Gesellschaft für Technische Zusammenarbeit (GTZ) GmbH
- German Agro Action (GAA)
- International Federation of Red Cross and Red Crescent Societies
- Mission East (ME)
- Triangle Generation Humanitaire
- World Food Programme (WFP)

APPRAISAL SERVICES

When independent verification is required of prices of individual products or even entire projects a thorough analysis of price structures and market conditions and technical evaluations will be required. Commodity Inspection Services BV offer such appraisal services on behalf of governmental organizations, NGO's and commercial companies.

Upon completion of the valuation an appraisal certificate is issued which duly indicates the market price of the subjected goods or project. This service is especially useful in cases where public funds are allocated and where it should be evidenced that these funds have been spent efficiently. Besides that it is used by organizations such as buying organizations in cases where they do not have sufficient information or experience with certain products.

Commodity Inspection Services BV have a reputation of being able to render this service in a practical and professional manner and maintain large databases enabling to give instant solutions for many products.

INSPECTION FIELDS

The following description of plant, machinery, equipment and material gives an idea about the diversity of our activities:

CRANES AND MATERIAL HANDLING EQUIPMENT

such as mobile cranes and hoists, overhead traveling cranes, conveyors, fork-lift trucks, scrapers, etc.

COMPLETE INDUSTRIAL PROJECTS AND PLANTS

such as metallurgical plants, production plants of all types, chemical plants, lines of filling and sealing ampules, etc.

INSTRUMENTATION

such as measuring and recording devices for flow, temperature, pressure, speed and acceleration, humidity

STEEL STRUCTURES

such as bridges, towers, industrial buildings, storage tanks, etc.

MACHINERY

such as compressors, blowers, fans, machine tools, diesel engines, machines for textile, climatisation, plastic injection, pumps, valves, turbines, etc.

STEEL

such as billets, slabs, sheets, pipes, ropes, beams, coils, rebars, etc.

NONFERROUS METALS

such as copper anodes, zinc concentrate, lead, etc.

BASIC MATERIALS

such as cement, clinker, plastics, etc.

PAPER

such as kraft paper, printing paper for offset printing, etc.

AUTOMOTIVES

such as cars, buses, trucks, tractors, etc.

ELECTRICAL MATERIAL

such as power stations, transmission lines, poles, generator sets, electrical substations, transformers, cables, cubicles, switch-gears, cabinets

RAILROAD EQUIPMENT

such as permanent way material and fastenings, rails, freight cars, turntables, signaling equipment, gensets

TELECOMMUNICATION

such as complete telephone control equipment, broadcasting equipment, mobile telecom equipment, cables

(PETRO)-CHEMICALS

such as crude & petroleum products, fertilizers, pesticides, alcohol & solvents, pharmaceuticals and concentrates, etc.

GRAINS, CEREALS, OIL SEEDS AND PULSES

such as wheat, maize, corn, barley, rice, flour, lentils, tea, etc.

FOODSTUFFS

such as edible oils, fats, frozen and canned foods, sugar, dairy products, etc.

PROJECTS

New Cotton Yarns Spinning Mill to be built
at Lattakia, Syria.
Output 15,000 tons on yearly basis.
F.O.B. value approximately
USD 120,000,000.00

New Cotton Yarns Spinning Mill to be built
at Idleb, Syria.
Output 15,000 tons on yearly basis.
F.O.B. value approximately
USD 120,000,000.00

PROJECTS

Six Complete Dates Products Processing
and Packaging Lines
Output approximately 4,000 tons on yearly
basis (various products) F.O.B. value ap-
proximately € 12,500,000.00

Salted Peanut and Peanut Butter Process-
ing Lines Output approximately 2,000 kgs
per hour (various products) F.O.B. value
approximately € 1,100,000.00

PROJECT

4 Silos to be erected at Tal Kalakh, Sinjar,
Al Bab and Al Kisweh
Storage capacity 50,000 tons each. F.O.B.
value approximately € 21,500,000.00

EQUIPMENT

three-phase transformers, switch gears,
transformer feeder, ring main unit, 20 KV
incoming switchgear, fly bobbins, plastic
spinning tubes, plastic doubling bobbins,
plastic cones, hard paper cones, mobile
textile vacuum cleaners, water treatment
installation, hydraulic bale presses, air
compressors, air dryers, general purpose-
filters, high efficiency filters, compressed
air tanks, chillers, overhead traveling clean-
ers, drawing frames, super lap, combers,
drawing frames, high speed combing ma-
chines, high efficiency axial-flow fan, drive
motors, drum filter, spiral casing, waste
collection plant, conveyor fan, louver
dampers, piping system for chillers, chilled
water pumps, slots, doors, heat exchang-
er, cyclone dust, pipe system for refrigera-
tion plant, pumps for cooling tower, etc.

EQUIPMENT

cleaning lines, packaging equipment, di-
lution equipment, micro-filters, evapora-
tion equipment, fermentation equipment,
bottling equipment, cooking equipment,
steam generators, cooling towers, labora-
tory equipment, sorting lines, elevators,
(pre) cleaning machines, electric panels,
conveyors, roasters, storage bins, vacu-
um deaeration units, heat exchangers,
process coolers, oil frying & salting units,
sieves, hoppers

EQUIPMENT

weighbridges, hydraulic truck dumpers,
chain conveyors, electronic scales, aspira-
tors, air jet filters, radial ventilators, dosing
units for pellets, temperature measuring
equipment, elevators, steel structures, ro-
tary screw compressors, air, drying units,
fire fighting equipment & pumps, diesel
generating sets, switch plants, compensa-
tion plants, lighting protection, personal
hoists
